PART I

ELECTION DAY - BRIEF REPORT

Voting started at Unit 001, Ward 04, Ifedayo LGA at 8:30 am on Saturday 16th of July, 2022 with a very good turnout and closed at 2:30pm after which counting begun.

The ballot paper serial number used in voting is serial number 0650135 - 0650316 which the party agents and the voters were informed about. The number of accredited voters in the BVAS is 180. At the end of counting, PDP scored ~~88 while A~~ 92 while APC scored 88, there were two (2) blank votes and one (1) spoiled ballot paper making a total of ~~4~~ 182 ballots cast instead of the 180 accredited voters recorded on the BVAS. Recounting was done and efforts commenced to find the anomaly. The party agents insisted that from the serial number called, the ballot paper cast should be equal to 180 (subtracting the spoilt ballot). On checking, we discovered that serial number 0650178 occured twice which accounted for one of the ballot paper casted that was not captured in the party agents calculations. Further investigations revealed that an elderly woman named ABORISADE, GRACE ENIOLA with VIN: 90F5B 12420 29543 9702 who had issues with the various modes of verification (face ID and finger print) was erroneously allowed to vote. This accounted for the second ballot paper. However, whilst others could recall and understand the erroneous voting, a party agent was of the view that the serial number anomaly could not be reconciled. Failure to get to a conclusion led to the cancellation of the polling unit agreed by the polling agents of APC and PDP
