

PU - 005

position - presiding officer

there were nine total numbers of voters accredited. whereas the total number of vote casted were one hundred and forty three (143)

this happened on the ground that at the time of arrival late and at the time of arrival at the polling unit the BVAS was so difficult to accredit the voters and at a time it stops functioning. this triggered the voters and threaten never to allow me leave the place until I give them a manual accreditation.

because of this I have to give them a manual accreditation in order to save myself from harm/victimised
