

PART I

ELECTION DAY - BRIEF REPORT

12 February 1972

We set out from the PAC to the polling unit, and got there at exactly 7:00 am. We greeted and informed the village head of our arrival and went on to get our own estimate and pulled the voters register (notebook) on the way. We found 140 of a sudden some group of village came, screaming and shouting claiming that the list of registered voters was not in the village, saying it was wrong and a false polling unit. Even after a lot of discussion and convincing the village head still went on to say we were not to conduct the INDEPENDENT NATIONAL election, so we left. We left the village and went to the PAC and he advised us to return to the PAC and we did since they were no more voters alternatives. So election did not take place in this polling unit.
