Sir,

Report On the issues of manual accreditation

On 25th of February 2023, On the day of Presidential/Senatorial/House of Rep election, during the exercise I, Mr. Victor James, male, worked ~~RATECHS~~ officer at Bonny LGA, ward 12 Kalaibiama.

~~During the exercise~~

The said ward comprises of Kalaibiama, Kuroama, and 2 other communities which are separated by water. During the exercise, I was stationed at Kalaibiama and could not move to other communities due unavailability of speed boat to navigate these communities. But trained my presiding officers (POs) on how to trouble-shoot and hand the BVAS common issues.

On the polling units of Kuroama ~~the~~ BVAS could not function (hung) after ten (10) successful accreditation and the voters have voted dully, in the light of this issues the other voters could not carry out the civic duty which led to intense atmosphere that they ~~th~~reaten to beat up the Ad-hoc staff of INEC on the basis that they've hacked the device, So ~~Calls~~ were put across to me amist of bad network signal so I had to instruct the use of manual accreditation under duress at this point to save the lives of the Ad-hoc staff since I am immobile (no ~~boat~~) to ~~get~~ get there to ~~ce~~ ascertain the issue.

The polling unit where these took place is polling unit 6, and the login details are username - rivers070502o and Password - Z63718.

This is what transpire

VICTOR JAMES.
