

1. The first step in the process of the scientific method is to ask a question.
 2. The second step is to do background research.
 3. The third step is to form a hypothesis.
 4. The fourth step is to test the hypothesis by conducting an experiment.
 5. The fifth step is to analyze the data and draw a conclusion.
 6. The sixth step is to communicate the results.
 7. The seventh step is to repeat the experiment to verify the results.
 8. The eighth step is to publish the results.
 9. The ninth step is to have the results peer-reviewed.
 10. The tenth step is to have the results accepted for publication.
