REPORT AT POLLING UNIT 37-03-01-011

The polling unit was arranged by 9:30am, the election going smoothly not until some hoodlums came and disrupt the the election and vandalized two of our ballot boxes and table. There was no injury or any form to we the officials. We were able to protect some of our materials, such as: BVAS, writing materials two of the ballot boxes etc.

The security personnels were called to our rescue even though it took them time to show up. We could not go on the voting process due to the conflict. After the whole scene, the voters insisted we must continue with the voting process which we agreed after so much pressure and threats.

The voting process ended and there was another heated argument concerning the counting of the ballon papers. We couldn't go ahead with the counting because other units ballot papers had mixed up with ours. After so much delibration on what to do, we agreed with the party agents to accompany us to the RAC centre for avoid any form of unfair accountability. We closed the election process at about 4:00pm and we escorted the some of the security personnel back to the RAC center.
