

13/07/2020

1. The temperature of the water increases as time increases.
2. The rate of increase is constant.
3. The temperature of the water is directly proportional to time.
4. The temperature of the water is a linear function of time.
5. The temperature of the water is a straight line graph.
6. The temperature of the water is a linear relationship.
7. The temperature of the water is a linear function.
8. The temperature of the water is a straight line.
9. The temperature of the water is a linear graph.
10. The temperature of the water is a linear relationship.
